

EHFCN WEBINAR

Using AI to enhance data quality of paper billing by caregivers: a business case

Short description

A business case of how we implemented Artificial Intelligence to enhance the treatment of paper billing.

Description of the project.

Defined goals

The purpose of this webinar will be to share information regarding the implementation of Artificial Intelligence to improve the treatment of paper billing, explain how this has been thought out and identify the benefits of such a method.

After the webinar, the presentation (PPT & video) will be available on the Webinar Platform.

Contact details for more information

This webinar is an initiative of EHFCN, with the collaboration of christelijke mutualiteit/mutualité chrétienne, one of the Belgian health insurance fund mutual.

EHFCN WEBINAR

Using AI to enhance data quality of paper billing by caregivers: a business case

Speaker

Johan van Dorst: graduated in 2004 as speech therapist and started at CM in 2006 as expert speech therapist and revalidation. In 2012, he started the team Quality and Data Mining as staff member Quality. In this team, they focus on enhancing internal quality of billings and payments for members and healthcare providers. They also focus on optimizing the control processes in function of the applicable regulations. In addition, they also investigate reports of fraud from healthcare providers, and they also work closely with the other healthcare insurances.
